

## Openness - Scenario 2

**Background:** Lucy is 9 years old and **has Autism**. Her father John is trying to find a Soccer club for her to join as she loves to watch it on the television. Lucy does not like to be too warm and gets overwhelmed if she is too hot.

Scenario:

John reached out to their local club to see if Lucy could join the u10 team but the coach responded saying,

“She won’t be able to train, it involves running around and she will definitely get too warm...”

The coach suggests that she tries to get involved in a different sport.

How open is the club's response?

What assumptions are being made here?

How could this club show more openness in the way they respond and support?
